# Welcome to the Maldives

## Geography

The Maldives is an equatorial island nation located in the Indian Ocean. There are 1192 islands in the nation, which spans an area of 871 kilometres. Only 298 square kilometres out of the country's total area of 90,000 square kilometres is made up of dry land.

Visitors are mesmerised by the country's distinctive geography. Reefs with bands of colour, little islands resembling jewels, and the purest shallow waters one can imagine are all encircled by the whitest, softest sand. There are 200 inhabited islands, and only a few from each atoll are home to resorts. Other islands are used for industry and agriculture.

The Maldives is breathtaking both above and below the ocean. About five percent of the world's reefs, are found in the Maldives. Over one thousand species of fish call these vibrant corals home. Travellers can encounter incredible animals such as manta rays, whale sharks, and sea turtles in these shimmering waters.

# RESORTS

From ultra-luxurious resorts frequented by the world's travel elite to the more boutique options, the resorts of the Maldives have one thing in common. Each resort boasts its very own private island and it's yours to enjoy. Private beaches, sumptuous meals, a host of activities that will certainly quench your wanderlust.

Be it the wonder of diving, the thrill of watersports, exquisite spas, or memorable excursions, they offer it all.

While some are focused on family holidays others may offer a higher degree of adventure and activity. Whatever resort you choose you can be assured of your freedom, peace of mind and adventure, together with the impeccable service Maldives is so well known for.
